With Halloween just a few days away I thought it was time to update our **Halloween Photography Tips** article with some new information and photos.

## **Photography Tips to Keep in Mind for Halloween**

There are plenty of subjects around to photograph at Halloween ranging from the traditional jack-o-lantern through to people in costume, to trick or treat 'treats' etc. It's a time of color, emotion and lots of interesting subjects.

The keys to capturing them are not that different from the normal keys to good composition in photography. As you photograph Halloween this year keep in mind some of the basics of good digital photography. I've selected the following tutorials that we've written before that should be helpful in your Halloween photography:

## Find Points of Interest

[Photo by Sara Heinrich](#)

Before hitting the shutter ask yourself ‘what is the focal point (or point of interest) in this image?’ All good images have something in them that holds the attention of those who view them – [learn more about focal points and how to enhance them here](#).

## Rule of Thirds

One way of enhancing the composition of your shots is to place your points of interest in smart positions. While the [rule of thirds](#) can be broken with great effect it’s a useful principle to keep in mind.

## Fill Your Frame

Halloween is a time of drama and you can add to this in your images by getting in nice and close and [filling the frame](#) with your subjects. Whether it’s people or objects – getting in nice and tight will usually add punch to your shots.
